

CALL FOR PAPERS

23rd Annual Computer Security Applications Conference (ACSAC 2007)

Miami Beach, Florida, USA – December 10-14, 2007

ACSAC is an internationally recognized forum where practitioners, researchers, and developers in information system security meet to learn and to exchange practical ideas and experiences. Papers offering novel contributions in any aspect of computer and application security are solicited. Papers may present technique, applications, or practical experience, or theory that has a clear practical impact. Papers are encouraged on technologies and methods that have been demonstrated to be useful for improving information systems security and that address lessons from actual application. Topics of interest include, but are not limited to:

access control	identification and authentication	operating systems security
applied cryptography	identity management	peer-to-peer security
audit and audit reduction	information survivability	privacy
biometrics	insider threat protection	product evaluation criteria and compliance
boundary control devices	integrity	risk/vulnerability assessment
certification and accreditation	intellectual property rights protection	secure location services
database security	incident response planning	security engineering and management
denial of service protection	intrusion detection and event correlation	security in IT outsourcing
defensive information warfare	malware	service oriented architectures
electronic commerce security	middleware and distributed systems security	software assurance
enterprise security	mobile and wireless security	trust management
forensics	modeling and simulation related to security	voip security

Paper submissions. Submitted papers must not substantially overlap papers that have been published or that are simultaneously submitted to a journal or a conference with proceedings. Papers should be at most 15 pages including the bibliography and well-marked appendices (single column, using 11-point font and reasonable margins on letter-size paper). Committee members are not required to read the appendices, and so the paper should be intelligible without them. All submissions should be appropriately anonymized (i.e., papers should not contain author names or affiliations, or obvious citations). Submissions are to be made to the submission web site at <http://www.acsac.org>. Only pdf or postscript files will be accepted. Submissions not meeting these guidelines risk rejection without consideration of their merits. Papers must be received by the deadline of **June 3, 2007**. Authors of accepted papers must guarantee that their papers will be presented at the conference.

Other submissions. Detailed submission information for panels, tutorials, workshops, case studies, work in progress, and exhibitor information can be found at <http://www.acsac.org/cfp>.

General Chair

Cristina Serban
AT&T, USA

Program Chair

Pierangela Samarati
University of Milan, Italy

Program co-Chair

Charles Payne
Adventium Labs, USA

Important Dates

Paper Submission due: **June 3, 2007**
Acceptance notification: **August 13, 2007**
Final papers due: **September 13, 2007**

Program Committee

Tuomas Aura, Microsoft Research, UK
Lujo Bauer, Carnegie Mellon University, USA
David Elliott Bell, Off This Week, USA
Terry Benzel, University of Southern California, USA
Konstantin Beznosov, University of British Columbia, Canada
Rafae Bhatti, Florida International University, USA
Marc Dacier, Eurecom Institute, France
Sabrina De Capitani di Vimercati, University of Milan, Italy
Mary Denz, Air Force Research Laboratory, USA
Jan Eloff, Rand Afrikaans University, South Africa
Philip W. L. Fong, University of Regina, Canada
Sara Foresti, University of Milan, Italy
Michael Franz, University of California, USA
Carrie Gates, CA Labs, USA
Dieter Gollmann, Hamburg University of Technology, Germany
Steven Greenwald, Independent Consultant, USA
Tom Hinke, NASA Ames, USA
Tom Haigh, Adventium Labs, USA
Wesley Higaki, Symantec Corporation, USA
Cynthia Irvine, Naval Postgraduate School, USA
Sushil Jajodia, George Mason University, USA
Jan Jürjens, TU Munich, Germany
Myong Kang, Naval Research Laboratory, USA

Angelos Keromytis, Columbia University, USA
Wenke Lee, Georgia Institute of Technology, USA
Ulf Lindqvist, SRI International, USA
Peng Liu, Pennsylvania State University, USA
Javier Lopez, University of Malaga, Spain
Bryan Lyles, Telcordia Technologies, USA
Patrick McDaniel, Pennsylvania State University, USA
Jelena Mirkovic, University of Delaware, USA
Peng Ning, North Carolina State University, USA
Stefano Paraboschi, Università di Bergamo, Italy
Joon S. Park, Syracuse University, USA
Lillian Rostad, Norwegian U. of Science and Tech., Norway
Reiner Sailer, IBM T.J. Watson Research Center, USA
Andre dos Santos, U. of Puerto Rico-Mayaguez, Puerto Rico
Christoph Schuba, Linköpings Universitet, Sweden
Kent Seamons, Brigham Young University, USA
Anoop Singhal, National Institute of Standards, USA
Carol Taylor, University of Idaho, USA
Dan Thomsen, Cyber Defence Agency, USA
Paul Van Oorschot, Carleton University, Canada
Giovanni Vigna, University of California, USA
Simon Wiseman, QinetiQ, USA
Diego Zamboni, IBM Zürich Research Lab., Switzerland
