

Call for Participation

ACSAC 22

Miami Beach, Florida
December 11-15, 2006
<http://www.acsac.org>

ACSAC is an internationally recognized forum where practitioners, researchers, and developers in information system security meet to learn and to exchange practical ideas and experiences. If you are developing practical solutions to problems relating to protecting commercial enterprises' or countries' information infrastructures, consider submitting your work to the Annual Computer Security Applications Conference.

We are especially interested in submissions that address the application of security technology, the implementation of systems, and lessons learned. Some example topics are:

- > Access control
- > Applied cryptography
- > Audit and audit reduction
- > Biometrics
- > Boundary control devices
- > Certification and accreditation
- > Database security
- > Denial of service protection
- > Defensive information warfare
- > Electronic commerce security
- > Enterprise security
- > Forensics
- > Identification and authentication
- > Information survivability
- > Insider threat protection
- > Integrity
- > Intell. property rights protection
- > Incident response planning
- > Intrusion detection and event correlation
- > Malware
- > Middleware and distributed systems security
- > Mobile and wireless security
- > Modeling and simulation related to security
- > Operating systems security
- > Product evaluation criteria and compliance
- > Privacy
- > Risk/vulnerability assessment
- > Security engineering and management
- > Service Oriented Architectures
- > Software assurance
- > VoIP security

This year, ACSAC has identified important topics and key technology areas having a significant impact on enterprise security both in the public and private sectors. These topics include: Vulnerability Management, Industrial Control System Security, Minimum Security Requirements (FIPS 200), Personal Identity Verification (FIPS 201), Federal Information Security Management Act of 2002 (FISMA), and Certification and Accreditation. We are soliciting proposals from government and industry in these key focus areas and will assemble a select group of presentations called **Case Studies in Applied Security** with participation from both contributing sectors. These case studies in applied security will reinforce the commonality of purpose among government and industry participants in helping to provide more effective information security for the critical infrastructure and electronic commerce applications within the United States and internationally.

Conference Chair (conference_chair@acsac.org)

- > Dan Thomsen, Cyber Defense Agency, LLC

Program (program_chair@acsac.org)

- > Christoph Schuba, Linköpings University (Program Chair)
- > Charles Payne, Adventium Labs (Program Co-chair)
- > Pierangela Samarati, University of Milan (Program Co-chair)
- > Tuomas Aura, Microsoft Research, UK
- > Lujo Bauer, Carnegie Mellon University
- > Terry Benzel, USC - ISI
- > Konstantin Beznosov, University of British Columbia
- > Rafae Bhatti, Florida International University
- > Marc Dacier, Eurecom Institute
- > Carrie Gates, CA Labs
- > Dieter Gollmann, Hamburg University of Technology
- > Wesley Higaki, Symantec Corporation
- > Cynthia Irvine, Naval Postgraduate School
- > Paul Jardetzky, Network Appliance, Inc.
- > Jan Jürjens, TU Munich
- > Myong Kang, Naval Research Laboratory
- > James Kempf, DoCoMo Labs USA
- > Angelos Keromitis, Columbia University
- > Carl Landwehr, University of Maryland
- > Michah Lerner, Dow Jones & Co.
- > Peng Liu, Pennsylvania State University
- > Javier Lopez, University of Malaga
- > Bryan Lyles, Telcordia Technologies
- > Patrick McDaniel, Pennsylvania State University
- > John McDermott, Naval Research Laboratory
- > Joon S. Park, Syracuse University
- > Andre dos Santos, University of Puerto Rico at Mayaguez
- > Anoop Singhal, NIST
- > Giovanni Vigna, University of California Santa Barbara
- > Simon Wiseman, QinetiQ
- > Diego Zamboni, IBM Zürich Research Laboratory

Panels (panels_chair@acsac.org)

- > Paul Jardetzky, Network Appliance, Inc.

Tutorials (tutorial_chair@acsac.org)

- > Daniel Faigin, The Aerospace Corporation

Workshop (workshop_chair@acsac.org)

- > Harvey Rubinovitz, The MITRE Corporation

Case Studies (casestudies_chair@acsac.org)

- > Steven Rome, Booz Allen Hamilton

Works in Progress (wip_chair@acsac.org)

- > Cristina Serban, AT&T

Invited Speakers (invitedspeakers_chair@acsac.org)

- > Tom Haigh, Adventium Labs and Cyber Defense Agency, LLC

Exhibitor info (http://www.acsac.org/exhibitor_info)

	<i>Description</i>	<i>Submit</i>	<i>Due Date</i>	<i>Notifications</i>
Technical Track	Peer reviewed and published in proceedings	full paper	Jun 4, 2006	Aug 13, 2006
Panels	Proposals for expert panel discussions	1 page proposal		Aug 13, 2006
Tutorials	Proposals for giving in-depth seminars	proposal		Jul 20, 2006
Workshop	Interactive workshops on current issues	proposal		Jul 20, 2006
Case Studies in Applied Security	Applying security to real world issues	abstract and speaker bio		Aug 15, 2006
Works in Progress	Five minute presentations on the latest work	1-2 page abstract	Sep 8, 2006	Oct 1, 2006

Detailed submission information for all categories at: <http://www.acsac.org/cfp>
