Call for Papers

ACSAC is an internationally recognized forum where practitioners, researchers, and developers in information system security meet to learn and to exchange practical ideas and experiences. The 27th Annual Computer Security Applications Conference will be held in Orlando, Florida, USA. If you are developing practical solutions to problems relating to protecting commercial enterprises’ or countries’ information infrastructures, consider submitting your work to the Annual Computer Security Applications Conference.

We solicit papers offering novel contributions in any aspect of applied security. Papers are encouraged on results that have been demonstrated to be useful for improving information systems security and that address lessons learned from actual application. All topic areas related to applied security are of interest.

Paper Submissions

Submitted papers must not substantially overlap papers that have been published or that are simultaneously submitted to a journal or a conference with proceedings. Submitted papers should be at most 15 pages including the bibliography and well-marked appendices and formatted as a single column, using 11-point font and reasonable margins on letter-size paper. This format enhances readability for the reviewers. Accepted papers must be reformatted to 10 pages maximum, according to the ACM instructions at http://www.acm.org/sigs/publications/proceedings-templates, using the template Option 2 "WITH permission block". Committee members are not required to read the appendices, and so the paper should be intelligible without them. All submissions should be appropriately anonymized (i.e., papers should not contain author names or affiliations, or obvious citations). Submissions are to be made using the OpenConf system at http://www.acsac.org. Only PDF files will be accepted. Submissions not meeting these guidelines risk rejection without consideration of their merits. Papers must be received by the deadline below. Authors of accepted papers must guarantee that their papers will be presented at the conference.

Important Dates

Submission Deadline: June 6, 2011, (2359 Samoa time, UTC-11)
Authors Notification: August 15, 2011

An extended call for papers and additional information about the conference can be found at http://www.acsac.org or by sending email to program@acsac.org.

Conference Chair
Robert F. H. Zakon, Zakon Group LLC

Program Chairs
John McDermott, US Naval Research Laboratory (Chair)
Michael Locasto, University of Calgary (Co-Chair)

Program Committee
Mark Aldrich, Deloitte & Touche
Vijay Atluri, Rutgers University
Tuomas Aura, Microsoft Research
Lee Badger, U.S. National Institute of Standards and Technology
Elisa Bertino, Purdue University
Matt Bishop, University of California, Davis
Nikolaos Bourbakis, Wright State University
Kevin Butler, University of Oregon
Srjdan Capkun, ETH Zurich
Justin Cappos, University of Washington
Christian Collberg, University of Arizona
Michael Collins, Redjack
George Coker, US Government
Baris Coskun, AT&T Security Research Center
Marc Dacier, Symantec Corporation
Mary Denz, U.S. Air Force Research Laboratory
Sven Dietrich, Stevens Institute of Technology
Yingfei Dong, University of Hawaii
Zhenhai Duan, Florida State University
Mohamed Eltoweissy, Pacific Northwest National Laboratory
Jeremy Epstein, SRI International
Richard Ford, Florida Institute of Technology
Michael Franz, University of California, Irvine
Leo Freitas, Newcastle University
Carrie Gates, CA Labs
Tyrone Grandison, IBM Research
Steven J. Greenwald, Independent Security Advisor
Guofei Gu, Texas A&M University
Cynthia Irvine, U.S. Naval Postgraduate School
Trent Jaeger, Pennsylvania State University
Apu Kapadia, U. Indiana Bloomington
Angelos Keromytis, Columbia University
Michiharu Kudoh, IBM Tokyo Research Laboratory
Ben Laurie, Google Research
Milo Martin, University of Pennsylvania
Chris Masone, Google Research
Patrick McDaniel, Pennsylvania State University
John McHugh, University of North Carolina
Peng Ning, North Carolina State University
Charles Payne, Adventium Labs
Katrin Borcea-Pfitzmann, Technische Universität Dresden
Christian Probst, Technical University of Denmark (DTU)
Lillian Røstad, Norwegian U. of Science and Technology
Reiner Saifer, IBM T.J. Watson Research Center
Pierangela Samarati, University of Milan
Christoph Schuba, Oracle Corporation
R. Sekar, Stony Brook University
Cristina Serban, AT&T
Brian Snow, Independent Security Advisor
Anil Somayaji, Carleton University
Angelos Stavrou, George Mason University
Patrick Traynor, Georgia Institute of Technology
Venkat Venkatadrikrishnan, University of Illinois at Chicago
Dongyan Xu, Purdue University
Alec Yansinsac, University of South Alabama
